Heth, here is the webpage and .pdf file for the revised format...

We may only need 1 table for fixed locations and 1 table for roving/special monitoring, but try to stick to their data elements (analyte, high, average, number of readings, etc)...

Probably only need 1 map of monitoring locations...

Thanks.... Again, work on most recent date data first and then work backwards on previous day... would like to at least post most recent data by end of today in new format...

Thanks..

Faithfully yours,
